

# Honeywell Home Technical Training

## Lyric Platform Training

Join ADI for technical training on the Lyric Wireless Home Control series solutions. The Lyric Controller serves as the central hub for security and lifestyle management including: lights, locks, thermostats and more— all controlled wirelessly from a dynamic 7-inch display or remotely on smart devices.

The Lyric controller supports both the encrypted SiX™ two-way and 5800 Series wireless family, giving you the flexibility to meet any installation requirement. Learn about the 'Lyric Lock' feature that protects accounts and SiX™ two-way enrolled hardware.

Programming and remote management can be done via AlarmNet 360™ for easy maintenance and faster, more efficient installs.

Participants are recommended to bring or purchase a Lyric Controller to take advantage of the hands-on training experience.

**Lunch will be provided.**

**Note: It is recommended participants bring or purchase a Lyric Controller.**
